SKILL

- **Languages:** Python, C.
- **Core Concepts:** Data Structures Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Machine Learning (Supervised, Unsupervised).
- **DevOps & Cloud:** Maven, Git, GitHub, Docker, Jenkins, n8n, AWS (EC2, S3).
- **Tools & Database:** PyCharm, Linux (Ubuntu, WSL), MySQL.
- **Soft Skills:** Problem-Solving, Communication, Continuous Learning, Technical Research & Innovation.

INTERNSHIP

Developer | Yoyo Media Square | Certificate

Jun' 23 – Jul' 23

Software Development Intern.

- Refactored front-end scripts to improve 80% UI responsiveness and enhance user experience.
- Optimized backend integration and workflow efficiency, resulting in noticeably faster platform reliability.
- Delivered a 15% reduction in load time and a 20–25% improvement in overall page throughput with smoother cross-browser functionality.
- **Tech:** HTML, CSS, JavaScript, PHP.

PROJECTS

Resume Previewer – DevOps CI/CD Automation Pipeline | GitHub

May' 26 – Apr' 26

- Developed a full-stack Resume Previewer application and implemented an end-to-end CI/CD pipeline to automate build, containerization, and deployment processes using modern DevOps practices.
- Integrated GitHub, Jenkins, Maven, Docker, and Docker Hub to automate source code management, application builds, container image creation, and cloud deployment with minimal manual intervention.
- Deployed the backend on Render and the frontend on Verel, enabling faster, reliable software delivery through an automated CI/CD workflow and reducing manual deployment effort.
- **Tech:** Maven, Git, GitHub, Jenkins, Docker (Compose, Hub) GitHub Actions, Render, Verel, Linux (Ubuntu/WSL).

Rupantara – Unsupervised cross-species Face Gen and rev match | GitHub

Oct' 25 – Dec' 25

- Formulated an advanced deep-learning Architecture that maps, analyses, and transforms human and animal facial features to generate realistic hybrid representations.
- Established end-to-end feature-extraction pipelines and integrated them with a real-time interface for interactive hybrid face generation, transformation, and reverse mapping.
- Achieved precise cross-species feature correlation, improved algorithm stability, and produced consistent, high quality hybrid outputs for research, visualization, and experimental analysis with precision approaching 100%.
- **Tech:** Python, TensorFlow, OpenCV, GANs, CNN, Flask.

Legal Named Entity Recognition (NER) | GitHub

Oct' 25 – Dec' 25

- Engineered a multi-model Legal NER (ALBERT, Distil BERT, Bi LSTM +CRF, CRF) to extract entities (LAW, CASE, DATE, ORG, PERSON) from Indian legal documents with near-perfect performance (F1 = 0.95).
- Programmed a Tkinter GUI for Live entity tagging, color-coded visualization, and export of predictions to JSON/text formats.
- Implemented a workflow deployment from data preprocessing (IOB tagging) to processing framework with eval metrics.
- **Tech:** PyTorch, Transformers, TensorFlow/Keres, sklearn, Tkinter, NumPy, Pandas, Matplotlib

CERTIFICATES

- Advanced Learning Algorithms | DeepLearning.AI & Stanford Online | Coursera | [Certificate](#) May' 26
- Cloud Computing | NPTEL (IIT Kharagpur) | [Certificate](#) Apr' 26
- C Fundamentals of Data Structures | Centre for Professional Enhancement | LPU | [Certificate](#) Jul' 25

ACHIEVEMENTS

Hacker rank | rank 480th:

- 5★ in Python and Java, demonstrating strong problem-solving and coding skills

GeeksforGeeks:

- Solved **100+ DSA problems** across Easy, Medium, and Hard difficulty levels.

EDUCATION

Lovely Professional University

Phagwara, Punjab

Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.83**

Since Aug' 24

Lovely Professional University

Phagwara, Punjab

Polytechnic - Computer Science and Engineering; **CGPA: 8.6**

Aug' 21 - May' 24

Montessori Gurukul High School

Kurnool, Andhra Pradesh

Matriculation; **Percentage: 98%**

Apr' 19 – Mar' 20
